Concerned Scientists' Weekly News Bulletin [September 11th, 2023]

Our weekly bulletin collects and digests news of the past week. <u>Contributions welcome.</u> <u>Click here to view this weekly news bulletin on a web page. Previous weeks' bulletins are</u> <u>archived here.</u>

Hello again!

We are pleased to return to your inbox for the 2023-2024 academic year. You can expect a biweekly newsletter that compiles the latest science policy news at the local, national, and international level. Please send any articles, questions, or comments to Rose Schnabel at <u>raschnab@iu.edu</u>.

Please note the Advocates for Science at IU callout meeting in the 'Take Action' section below.

Best, CSIU newsletter authors Rose, Amangul, and Ana

NEWS ITEMS AND ARTICLES

The New York Times: Island nations hope for Court's help on climate's effects A tribunal is expected to issue an advisory opinion on behalf of Pacific and Caribbean countries on whether greenhouse gasses are pollutants that violate international law.

Inside Climate News: <u>Community leaders advocate for hydropower infrastructure along</u> <u>the Colorado River</u> As states negotiate future water cuts, some officials are looking to build new dams and reservoirs in the River's Upper Basin.

- *E&E News*: <u>As heat waves worsen, federal aid is insufficient to fund cooling needs</u> More than 30 million low-income households eligible for federal funding to defray the cost of air conditioning have not received government support.
- Nature: Scientists celebrate as UK rejoins Horizon Europe research program

UK researchers had been frozen out of the scheme for two years, amid disagreements over Brexit.

BBC: UN calls for radical changes to stem warming

The stocktake report will be considered by political leaders and will be central to global climate talks in Dubai later this year.

REGIONAL NEWS

Inside Indiana Business: Alliance aims for equitable placement of EV chargers

The group encourages the Indiana Utility Regulatory Commission to promote affordable and accessible electric vehicle charging options in underserved communities.

Indiana Public Media: <u>Columbus, IN mayor shuts down drinking water well</u> <u>contaminated with PFAS</u>

The city also hopes to drill new, safer drinking water wells and eventually add activated charcoal treatment to its water treatment process.

Northwest Indiana Times: Gary hosts statewide climate leadership summit

Held at Indiana University Northwest, the summit featured a dozen workshops and panels on topics from food waste to the Inflation Reduction Act.

Indy Star: <u>Will climate change affect hardiness zones for what to plant and when in Indiana?</u>

Growing conditions in Evansville or New Albany are a good model for what South Bend or Fort Wayne will be like in the future.

OPINION AND ANALYSIS

EOS: The Supreme Court is bypassing science-We can't ignore it

The court's exclusion of scientists from the environmental rulemaking process comes full circle as the EPA strips federal protections for wetlands.

The Washington Post: Extreme heat drives farmers to go nocturnal

Rising temperatures have led more farmers to harvest crops in the middle of the night to protect their workforce and the quality of their produce from extreme heat.

New York Times: <u>Want to understand clean energy anxiety? Look at the Jersey Shore.</u> We need to meet people resisting clean energy with gentleness and curiosity. Instead of shouting across a beach at our neighbors, we should focus on the fossil fuel industry that's trying to kick sand into our eyes.

The Guardian: <u>Climate politics is more complex and urgent than ever – is the IPCC still</u> <u>fit for purpose?</u>

With solutions to the climate emergency desperately needed, political neutrality and consensus may no longer be an option

The Washington Post: <u>Young people might be able to use an ancient right to save the climate</u>

A recent court decision, based on an ancient human right, reflects a promising legal strategy to push emissions reduction for the sake of future generations.

Politico: COP28: A chance to course-correct on the global clean energy transition

The global clean energy transition is dangerously off-course, but we can get back on track by taking urgent action now.

TAKE ACTION AND RESOURCES FOR ACTIVISTS

Advocates for Science at IU: <u>Encourage students to attend ASIU's virtual callout</u> meeting

Calling all IU students (undergraduate and graduate) interested in science and environmental advocacy! CSIU's student partner group, ASIU, will be hosting a callout meeting on Zoom at 6pm on Thursday, September 14th.

The CSIU Weekly News Bulletin is now available on the web. To view this page online go to <u>https://csiub.org/weekly-news-bulletins.</u> To view archives of past bulletins, see <u>https://csiub.org/bulletin-archives</u>.

Our CSIU news bulletin is intended to provide a brief update on recent news, editorials, as well as action items related to science integrity and science policy. Note that editorial pieces and action items are assembled from a variety of sources and organizations; they do not necessarily reflect the opinions or policy priorities of Concerned Scientists @ IU. This week's news bulletin was compiled by ASIU members senior Rose Schnabel, senior Amangul Hydyrova, and junior Ana Lim. If you'd like to volunteer—or if you have additional links you'd like to share for future bulletins, send them to Rose at raschnab@iu.edu. To join our listserv, send an email to csiu-l-subscribe@list.indiana.edu. To unsubscribe from this list, send an email to csiu-l-unsubscribe@indiana.edu. You can leave the subject line and message blank.
